

## DataCart

Compact case with trolley system for notebooks up to 16.4" and HP/Canon printers.

**The new DataCart, with its stable housing and locks, offers optimum protection for your mobile computing equipment. The notebook is optimally protected during transportation thanks to the extra padding in the notebook pocket. Also, the notebook pocket has been enlarged so that up to 16.4" notebooks now fit into it. Documents can be securely stored in the document pocket and in the separate document case, as before. With a quick movement this outer case can be removed from the back of the main case and used separately, if necessary. Two side cases offer extra storage space for mobile accessories such as mobile phones, keys, pens etc. Mains adapters are stored in the specially designed ABS box.**

All the wiring is run almost invisibly on the inside of the case. All devices are supplied with electricity using a single cable via an opening in the left side case. You simply take out the notebook to work on it. The printer is attached to the front flap, ideally with the optionally available "QuickFix" printer attachment. In order to ensure the printer flap does not open downwards when opening it has two snap-fasteners attached to the sides. These can be very simply unfastened for use so that the printer flap can be brought into position. The integrated trolley system ensures an especially comfortable transportation of your mobile office. The included detachable shoulder strap can also be used as an alternative transportation solution. \*All the devices pictured (such as notebook, printer etc.) are not included!

Screen size: 14 - 16.4 inches:  
Art.No: N25728K  
Weight: 5.9kg /13lbs0.1 ounces  
Material Synthetic Leather  
Compatible devices:

 ≤ 15.35 x 12.99 x 1.97 inches  
≤ 390 x 330 x 50 mm
