

# FIVE

PERFORMANCE AND SECURITY IN EVERY PERSPECTIVE

03/2025

# **FIVE – THE CONCEPT**

The FIVE is the natural evolution of DICOTA's business line. It follows the new, simplified naming strategy introduced with ONE as DICOTA's entry into professional carrying solutions and now with the all-new FIVE as a professional line for discerning business travelers.

It sits between the SELECT and PRO ranges and is aimed at ambitious professional consumers who need more than just a bag – they need a mobile office. FIVE combines reliable performance with enhanced security and practical comfort. The use of durable, recycled materials now extends to the interior of the bag, while the black and beige color scheme improves visibility and organization inside the bag. A well-structured front compartment provides quick access to power adapters and cables and helps prevent pressure points and display damage.

The notebook compartment features a self-closing zipper to prevent theft and DCT padding for reliable shock protection. A separate document compartment, additional space for accessories or a second device and new ergonomic features – including a trolley strap and a shoulder strap holder that doubles as a clasp – round off the design for everyday mobility. An integrated RFID protection secures passports and credit cards, while a special slot for tracking devices ensures that the bag can be located if misplaced.

FIVE is made for professionals who value efficiency, protection, and sustainability in every detail.

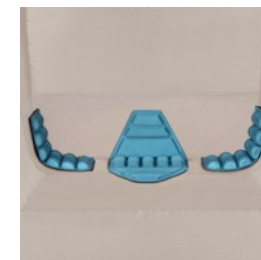

# FIVE – THE KEY FUNCTIONS

Durable, recycled materials - for the first time also in the interior - sustainable!

The front compartment allows quick access to the power supply and cables, protects the notebook from pressure marks and display damage. A slot for tracking devices allows the bag to be tracked - should the bag be forgotten, misplaced or even stolen.

Other compartments offer space for accessories, documents or an additional notebook/tablet. The notebook compartment with self-closing zipper makes theft more difficult and is equipped with high-density foam or DCT padding. The black-beige interior makes it easy to identify accessories.

Ergonomic handles, shoulder straps and a trolley attachment are standard features. A newly developed shoulder strap holder also allows the bag to be secured with a notebook lock - secure! An additional compartment with RFID protection secures passports and credit cards.

# FIVE – PERFORMANCE AND SECURITY IN EVERY PERSPECTIVE

A black backpack is shown with a white shirt draped over its left side. The backpack has multiple compartments and zippers. A small, rectangular, metallic-looking tag with the word "CICOTA" is attached to the front. The text "BACKPACK FIVE" is overlaid in white, bold, sans-serif font on the lower left portion of the image.

# BACKPACK FIVE

## BACKPACK FIVE

Designed for professionals on the go, the Backpack FIVE combines security, organization, and ergonomic comfort in a sleek and functional design. The protective notebook compartment features a V-shaped middle support, ensuring your device stays securely in place and optimally positioned. A front compartment with organized pockets keeps accessories and essentials neatly stored, while the ergonomic, breathable back cushion provides all-day comfort. Made from 32 recycled PET bottles, it's a sustainable choice that doesn't compromise on functionality or durability.

# BACKPACK FIVE

- DICOTA Cushion Technology (DCT) integrated for a perfect protection and fit of your notebook device
- Main compartment fits tablet, documents, and folders
- Mini pocket for quick-access items
- Side pocket for umbrella or bottle
- Breathable, ergonomic back padding
- Trolley belt for easy travel
- Metal D-ring for locks or accessories
- Lockable zippers with ring lock
- Loops for optional waist belt
- Hidden tracker slot and RFID-safe pocket
- Exchangeable/customizable metal logo plate for branding

A woman with long brown hair, wearing a white button-down shirt and tan trousers, is sitting on a black tufted leather sofa. She is holding a black rectangular bag with both hands. The bag has a top handle and a front zipper pocket. A small silver label with the word "DICTA" is visible on the front of the bag. The background is a plain light gray wall.

# MULTI TWIN FIVE

## MULTI TWIN FIVE

More than just a bag, the MULTI TWIN FIVE is a secure, functional, and eco-friendly companion for daily business needs. The lockable notebook compartment with HDF foam provides robust protection, while an inner tablet compartment ensures smaller devices are just as safe. A dedicated back compartment keeps documents organized, while the front section offers structured pockets for accessories. Thoughtfully designed for convenience, this bag is also made from 41 recycled PET bottles, combining sustainability with everyday practicality.
