

SAFETY AT WORK

HI-VIS

NO COMPROMISES

Maximum visibility for employees working outdoors.

Hi-VIS backpacks and bags offer professional support for anyone who works outdoors on a daily basis. They combine high visibility with ergonomic design, robust construction and extremely durable materials. The fabrics used comply with the requirements of the EN ISO 20471:2013 standard and ensure that employees always remain clearly visible even in difficult lighting conditions – which is a crucial factor in effective accident prevention.

Well-designed interior compartments support structured workflows, while the high-visibility materials provide additional safety, especially in the public transport sector, on railway and construction sites, and on the daily commute to work. The water repellent outer material in accordance with EN ISO 4920, Level 4, and the integrated rain cover offer reliable protection in bad weather.

Durability and responsibility are also key considerations. The models are ergonomically designed, offer a high level of carrying comfort and are made from recycled PET bottles. Thanks to the hook and loop surface, they are also easy to personalise with customer logos.

The Hi-Vis products from DICOTA are a professional and practical solution for even the most demanding outdoor tasks – consistently safe, robust and sustainable. Tried and tested in use by many leading companies.
