

**In the past 8 years, DICOTA has produced over 380,000 carrying solutions out of recycled PET. Currently, about 40% of the DICOTA core product range is made of recycled material. And this is just the beginning.**

While doing so we have been able to purposefully reuse over 3.2 million PET bottles (0.5l). Step by step we are replacing the main material for all our textile products with recycled alternatives, aiming for a 100% eco-friendly assortment in the future.

Plastic pollution is a global problem that affects both the environment as well as our health. Worldwide around 1 million PET bottles are sold every minute and only about 20% of global plastic waste is recycled. Consistent recycling helps to conserve resources and prevents plastics from ending up in landfills or in the water cycle, where they need around 450 years to biodegrade.

As a leading brand for premium bag solutions, we are consciously aware of our social and ecological responsibility. Our product innovations made from regenerated plastic bottles are not only reliable and cost-effective, but at the same time they are friendly to the environment.

The DICOTA products are your reliable companions, boasting high-quality recycled materials, the best protection and clever functionality.

**16 x PET** The number in the PET icon indicates how many bottles have been recycled in the production of the bag.

**1 2 3 4 5** Protection icon indicates types of protective padding for devices, locking features, rain protection, and water repellent zip.

**1 2 3 4 5** Functionality icon indicates systems and technologies, such as anti slip, fitall and EVA frame protection, as well as general product features such as the storage space and facilities.

## Supporting the Labdoo humanitarian project

Labdoo operates globally and provides schools, homes, educational institutions or integration projects with used, professionally prepared notebooks. By now has supported over 1,100 schools in more than 120 countries.

Drop off the notebooks which you no longer need at our company premises in Owen and Pfäffikon and we will donate them to the aid organization with an additional 25 Euros per piece donated.
