PROFESSIONAL SOLUTIONS

2018/1

SCREEN PROTECTION

Privacy for every device

Protect sensitive information on your devices and your privacy. Using state-of-the-art micro-lamella, the highly effective DICOTA privacy filters reduce your screen's field of vision and prevent personal and confidential information from falling into the wrong hands.

Secret 4-Way

The privacy filters block the view from four sides (left/right/top/bottom).

Secret 2-Way

The privacy filters block the view from two sides (left/right).

Anti Glare

The filters reduce reflections by sunlight and protect the display from scratches.

Tailored to your device

The films are available for all common notebooks, tablets, smartphones and monitors. Please see the current range on www.dicota.com.

For individual requirements, the films can already be custom-made in small quantities. For individual project inquiries we will gladly advise you at tailor-made@dicota.com.

Silicone, magnetic or side solution

The self-adhesive films come with a full surface silicone layer and are recommended for permanent privacy protection. For temporary use, choose the filters with magnetic strips or side fitting. The magnet solution is suitable for MacBooks and other devices with metal housing.

Gentle on your eyes and your sleep

Like daylight, LED displays have a high content of blue light. When the retina is exposed to this light at night, our internal clock is disturbed and the sleeping rhythm is negatively affected. Privacy filters reduce the amount of blue light emitted without compromising the image quality.

Clear view for any work environment

In addition to effective privacy protection, the filters prevent reflections and finger prints on the screen. Furthermore, the display is reliably protected against scratches and damage. The screen's touch function remains completely uncompromised in all models. Both the magnetic privacy filters and the side-mount models have a matte and a glossy side to optimally adjust the viewing conditions to your work environment.

SECURITY LOCKS

The right lock for each device

Notebooks as well as projectors, monitors and printers can be effectively secured with the DICOTA locking systems. Currently, device manufacturers use three different formats for the lock slots, each format is available in the DICOTA range.

Uncompromising protection

The high-quality DICOTA locking systems offer maximum protection without compromises. Thanks to an integrated multi-strand steel cable of up to 5.2 mm diameter and solid closing heads with a perfect fit.

Flexible workplace design

The turning and swivelling closing heads adapt ideally to your device. Thanks to the push-to-lock function, the locks can also be secured without a key using one hand. Quick, simple and reliable.

Good combination

With or without key? You have the choice. If you don't want to have keys, opt for a practical combination lock. With 10,000 combinations, the highest level of security is guaranteed.

For more information, please contact your IT dealer or send an email to: tailor-made@dicota.com.
