Messenger Bag REFLECTIVE black

Maximum work efficiency with high visibility

The Messenger REFLECTIVE enables safe and comfortable commuting with quick access to essential work tools, clothing and personal items. Its large ISO-certified reflective stripes ensure optimum visibility for employees working near traffic and public transport, day or night!

This high visibility messenger bag is a reliable aid for demanding working environments. It is designed to provide maximum ergonomics, practicality and durability for train, bus and tram drivers. The bag has 3M reflective stripes on the outside and its main fabric is made from recycled PET bottles to protect both workers and the environment.

The reflective stripes are certified to the European standard EN ISO 20471:2013 and provide excellent visibility, improving safety when working near traffic or railways. The outer fabric and zips are water-repellent and certified to EN ISO 4920 level 4.

The all-important interior can efficiently store both work and personal items. A safety vest and a tablet computer can be safely stored in two padded quick access pockets on the outside. There is also plenty of room for your smartphone, power supply, lunch box, torch and more thanks to a range of universal internal pockets. A Velcro panel on the flap allows you to personalise the Messenger with a name or logo patch.

Offering maximum space, comfort and visibility, the Messenger REFLECTIVE is perfect for a tough day's work. It also improves workplace safety and helps prevent accidents.
